

# Quality Control Innovation

## Inspection Booklets

### Description

We wanted something for new employees that was able to be used by all employees, new and veteran, that walked them through every aspect of our Pre-Pour and Post-Pour inspections (as a training tool) so they were all completed the same way and nothing was missed.

### Project Initiation

We had multiple QC Techs performing (and training) these inspections in a variety of ways.... This ensures that everyone is trained the same way, and all inspections are performed with 100% accuracy.

### Project Benefits

A standard for inspection of the pre and finished product that adheres to the ACPA and respective DOT's standards
