## Pallet Cleaner

### Description

Dell Bouchard at the Helena Plant designed and fabricated the pallet cleaner to fit on a mini skid steer (Toro Dingo) to save time and effort.

The yellow (brush head) easily drops on a pallet and rotates, brushing it clean. The brush heads have been fabricated for 12” – 36” pallets, reducing time and making the pallets super clean.

### Project Initiation

Manually cleaning pallets with a wire brush or steel wool is time consuming and not very effective.

### Project Benefits

Reduces time and makes the pallets super clean.
