

Existing Operation Equipment (i.e. cage roller, pipe machine, fork lift, etc.)

Red Light / Green Light Rebar Bender

Description

Red Light / Green Light Rebar Cutter provides a visual when team members can insert rebar into machine. Eliminating the chance of a team members from a pinch point. Two button start system, requires both hands in a safe position.

Project Initiation

An injury occurred when a team member within our company operating a rebar cutting machine pinched right off hand finger. A two button start system, requiring both hands in a safe position, and a visual green light indicating safe and red in operation was installed with our rebar cutting machine to eliminate the chance a pinch point to operator and any other team member.

Project Benefits

Visual green light indicating safe to insert or remove rebar and red light indicating in operation keep hands clear. Including a two button start system, requiring both hands in a safe position keeping hands clear from pinch points.
